

“With Nicky” - Equipment Anneleen’s pattern for the neck protector

- 1) Cut out a piece of leather or similar, approximately 1mm thick.

- 2) Fold over a piece of chamois leather, then mark around the piece of leather (already cut out), lining up the straight edge with the fold.
- 3) Stitch the two halves of the chamois leather together, approximately 5mm outside the line of the leather, leaving 20mm gaps next to the fold.
- 4) Cut off excess chamois leather outside of the stitching and turn the pouch inside out.

- 5) Insert cut out piece of leather into chamois pouch through one of the 20mm gaps.
- 6) Stitch 20mm gaps to close pouch while fixing elastic straps that will hang around the chin rest.
